STORE FULFILLMENT

Efficient stock management for distribution to physical stores

The Store Fulfillment module has been designed for companies that need real-time control over inventory of their warehouse and physical stores. Additionally, it syncs supply operations throughout the distribution network such as picking, replenishment, transfers between stores, and returns.

Best-in-class features of Store Fulfillment

- 1 WMS integration with point of sale (POS) terminals
- 2 Automatic replenishment of store items depending on stock level
- 3 Task generation after an in-store sale or return
- 4 Transfer of in-warehouse items to stores or between stores
- 5 Warehouse management with cash-and-carry model
- 6 Quick in-store stock counts
- 7 Coordinated counts between different operators
- 8 Automatic reports (stock level by store or stock on the way, etc.)

What benefits does it provide?

Inventory always updated in warehouse and stores

Coordinated transfers between stores

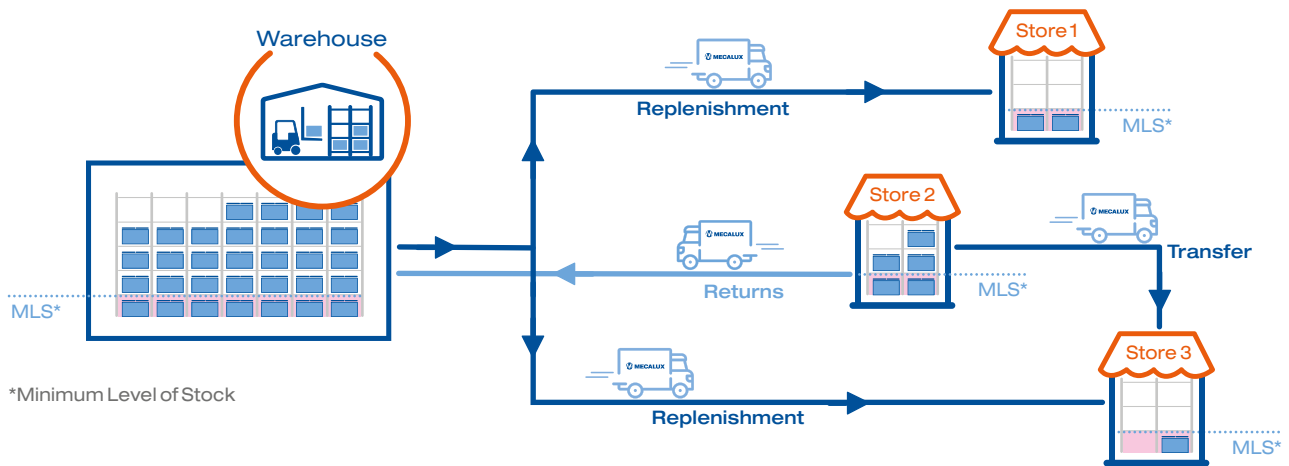

Stockouts eliminated in stores

Efficient customer returns management

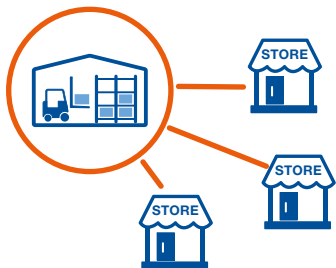

Task synchronization between warehouse and stores

End-to-end distribution visibility in real-time

Logistics process of the Store Fulfillment module

Store Fulfillment adapts to different store types

Independent stores

A distribution center serves one or more stores in different geographical locations. Stores are replenished with goods available in the distribution center. The system controls returns and transfers between stores.

Store incorporated in the warehouse with picking done for customers

Customers pick the products they need from the shelves and pay at the counter. In this case, the store and warehouse inventory are managed separately.

Shop incorporated in a warehouse with picking done by staff

Customers order the products they need at the store counter. Then, operators are responsible for locating them in the warehouse. Once the sale is made, the system updates the inventory automatically.

Why rely on Interlake Mecalux Software Solutions?

The company has 50 years of experience in software solutions and a presence in over 70 countries.

More than 370 engineers are exclusively dedicated to the development of logistics and supply chain software.

Over 1,000 installations in 36 countries are managed by Mecalux software solutions.

Software is continuously developed and updated, thanks to major investments in R&D.

Technical support is available in multiple languages 24 hours, 365 days a year.

Store Fulfillment synchronizes inventory and workflows to ensure optimal stock management between the central warehouse and the physical shop network
