MULTI CARRIER SHIPPING SOFTWARE

Automate order packaging, labeling and shipping

In today's market, any inefficiency in last-mile delivery could mean a serious loss of business. To respond to this challenge, Mecalux has launched the advanced Multi Carrier Shipping Software module to **automate direct communication between the warehouse and the various transportation agencies.**

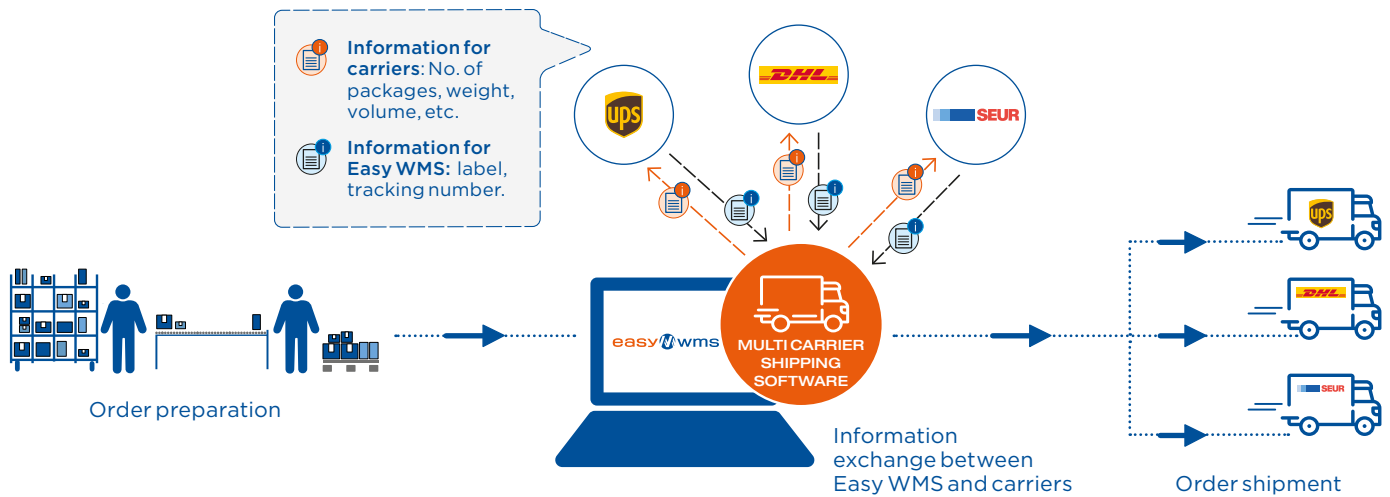

This additional module from Easy WMS is charged with organizing the packaging, labeling and shipping processes. Errors are, thus, eliminated in these operations, ensuring better service for end customers.

Implementing Multi Carrier Shipping Software gives your company **comprehensive control over the entire goods dispatch process:** from product packaging to the creation of the tracking number used to monitor the package. In addition, Multi Carrier Shipping Software generates and prints key documentation for effective shipments, e.g., the product shipping label and corresponding delivery note.

The module comes integrated with the major international transportation agencies. Nevertheless, as this product is continuously developed, other carriers used by our customers are incorporated on an ongoing basis. These are some of them:

Synchronization of the warehouse with transportation agencies

Multi Carrier Shipping Software from Easy WMS simplifies everyday interaction with transportation agencies so that logistics managers can focus on providing end customers with efficient, error-free service.

WHAT DO OUR CUSTOMERS SAY?

“With Easy WMS and Multi Carrier Shipping Software, we don’t make mistakes. We’re more productive, faster in order picking and distribution, and we’ve optimized our storage space.”

Thomas Largeron
Manager, La Ruche Logistique

Multi Carrier Shipping Software features

-  **Packaging** of the items that make up the order
-  Printing of a **delivery note** for each shipping order
-  Generation of carrier **labels**
-  **Tracking number** notification
-  **Real-time** synchronization between the warehouse and carriers
-  **Truck loading** by route (Easy WMS Enterprise functionality)
