STORE FULFILLMENT

Efficient stock management for distribution to physical shops

The Store Fulfillment module has been **designed for companies that need real-time control over inventory** of their warehouse and physical stores. Additionally, it syncs supply operations throughout the distribution network such as picking, replenishment, transfers between stores, and returns.

BEST-IN-CLASS FEATURES OF STORE FULFILLMENT

WMS integration with point of sale (POS) terminals

Automatic replenishment of shop items depending on stock level

Task generation after an in-shop sale or return

Transfers of in-warehouse items to shops or between shops

Warehouse management with cash-and-carry model

Quick in-shop stock counts

Automatic reports (stock level by shop or stock on the way, etc.)

What benefits does it provide?

|	
Inventory always updated in warehouse and shops	Coordinated transfers between shops
Stockouts eliminated in shops	Efficient customer returns management
Task synchronization between warehouse and shops	End-to-end distribution visibility in real-time

WAREHOUSE

Replenishment → Shop 1 — MLS*

Returns ← Shop 2 — MLS* — TRANSFER

Replenishment → Shop 3 — MLS*

MLS*

*Minimum Level of Stock

Store Fulfillment adapts to different shop types

Central warehouse with management of independent stores.
A distribution center serves one or more stores in different geographical locations. Stores are replenished with goods available in the distribution center. The system controls returns and transfers between stores.

Warehouse with direct sales. Customers pick the products they need from the shelves and pay at the counter. In this case, the store and warehouse inventory are managed separately.

Warehouse with management of integrated store.
Customers order the products they need at the store counter. Then, operators are responsible for locating them in the warehouse. Once the sale is made, the system updates the inventory automatically.

Why choose Mecalux Software Solutions?

The company has 55+ years of experience in warehousing solutions and a presence in over 70 countries.

More than 400 engineers are exclusively dedicated to the development of logistics and supply chain software.

More than 1,000 facilities in 36 countries are managed by Mecalux software solutions.

Software is continuously developed and updated, thanks to major investments in R&D.

Technical support is available in multiple languages 24 hours, 365 days a year.

Store Fulfillment synchronizes inventory and workflows to ensure optimal stock management between the central warehouse and the physical store network
